

# NKENEL HOLDINGS (PTY) LTD

## COMPANY PROFILE — TRANSPORT & LOGISTICS, MINING SECTOR

### ABOUT

Nkenel Holdings (Pty) Ltd is a transport service provider operating in the mining space, moving ore, aggregate, and other bulk material between extraction sites, processing plants, and stockpiles — from pit to plant to port. We work around the tempo of the site: load volumes, access constraints, and turnaround windows, so material keeps moving and production doesn't wait on transport.

### COMPANY & COMPLIANCE CREDENTIALS

|                       |                                    |
|-----------------------|------------------------------------|
| Registered Name       | Nkenel Holdings (Pty) Ltd          |
| CIPC Registration No. | 2025/844052/07                     |
| CSD Supplier No.      | MAAA1691958                        |
| Tax Status            | Tax Compliant (SARS)               |

### SERVICES

|                           |                                                                                             |
|---------------------------|---------------------------------------------------------------------------------------------|
| Bulk Material Haulage     | Moving ore, aggregate, and mined product from extraction sites to processing and stockpile. |
| Quarry-to-Plant Transport | Scheduled runs between pit and plant, built around each site's production tempo.            |
| Fleet & Route Planning    | Vehicles and routes planned around load volume, site access, and turnaround time.           |
| On-Site Logistics Support | Working alongside site operations to keep loading, weighing, and dispatch moving.           |

### FLEET

|                                       |                                                                                                  |
|---------------------------------------|--------------------------------------------------------------------------------------------------|
| Primary — 34-Ton Side Tipper Trailers | Core fleet, suited to bulk ore and aggregate haulage where fast, high-volume offloading matters. |
| Supporting — Tipper Trailers          | Additional tipper capacity to flex with load volumes and keep runs moving during peak demand.    |

### SAFETY & COMPLIANCE

Nkenel Holdings runs a rigorous, strictly-enforced safety and compliance vetting process — every driver, truck, and trailer is checked before it's cleared to run a load.

|              |                                                                                                      |
|--------------|------------------------------------------------------------------------------------------------------|
| Drivers      | Valid Professional Driving Permit (PrDP) and mine-site health & safety induction.                    |
| Vehicles     | Roadworthiness vetted against Certificate of Fitness (COF) and the National Road Traffic Act.        |
| Compensation | Cover maintained in line with the Compensation for Occupational Injuries and Diseases Act (COIDA).   |
| Operations   | Load, access, and turnaround procedures aligned with each site's own health and safety requirements. |
